-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4,5,7,22-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Hink et al (US 4933371; 6/12/90). Hink teaches an insecticide composition for controlling mosquitoes comprising linalool plus sesame oil (waxy component) or citric acid (waxy component). See abstract, column 6 lines 16-61, column 7 lines 32-41, column 9 lines 28-42, column 12 lines 43 – column 13 line 20. The composition as capable of dispensing by atomization, ionic dispersion, or fan-driven evaporation is an intended use. In a claim to a composition, a statement regarding the composition's intended use has no patentable significance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1616

Claims 2,3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hink as applied to claims 1,4,5,7,20,21. See 35 USC 102(b) rejections above. Hink teaches all that is recited by claims 2,3 except for the composition comprising the instant amount range of linalool. One having ordinary skill in the art would have been expected to determine the optimal amount of linalool. One would have been motivated to do this in order to develop a composition that would have been most effective in controlling mosquitoes.

Election Status

The elected composition comprising linalool in a waxy medium is taught by the prior art.
